Comfort Fabric Wall Panels

Our Comfort Range panels are designed as a wall lining to control sound reverberation in areas with hard surfaces. Comfort Range panels improve the atmosphere of the workplace environment due to the products ability to absorb echo and reverberation.

Overview

Designed with fabric finishes. Available in a vast range of fabrics and colours. Standard and bespoke sizes available. Outstanding sound absorption performance – 40mm thick panel achieves Class A & 25mm thick panel achieves Class C.

Features

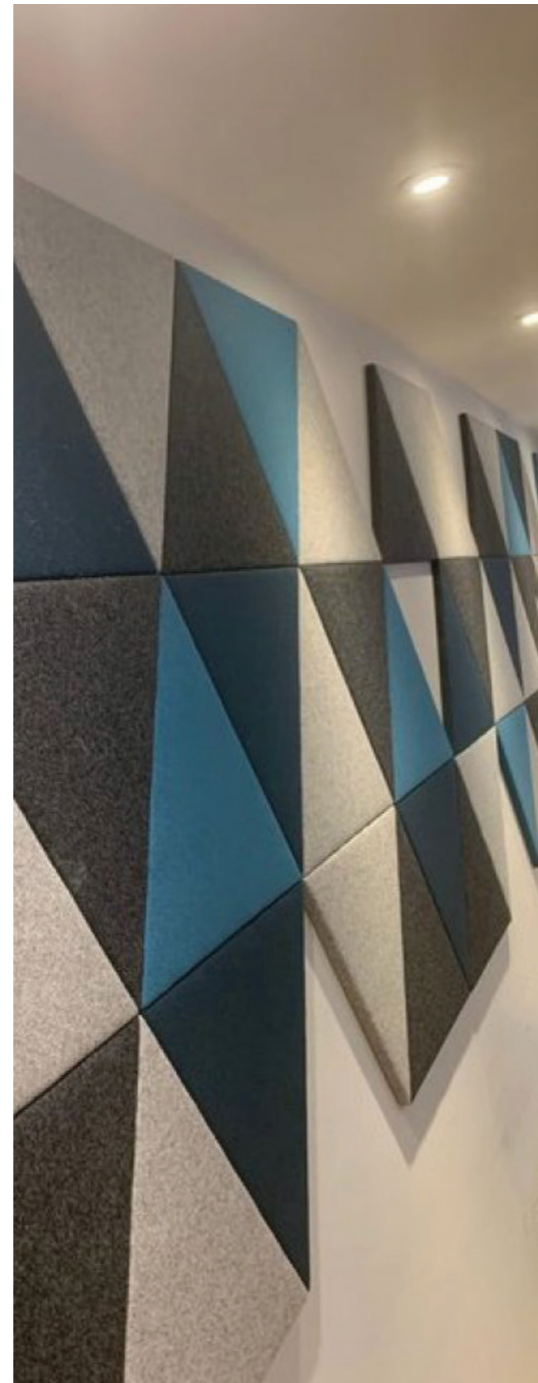

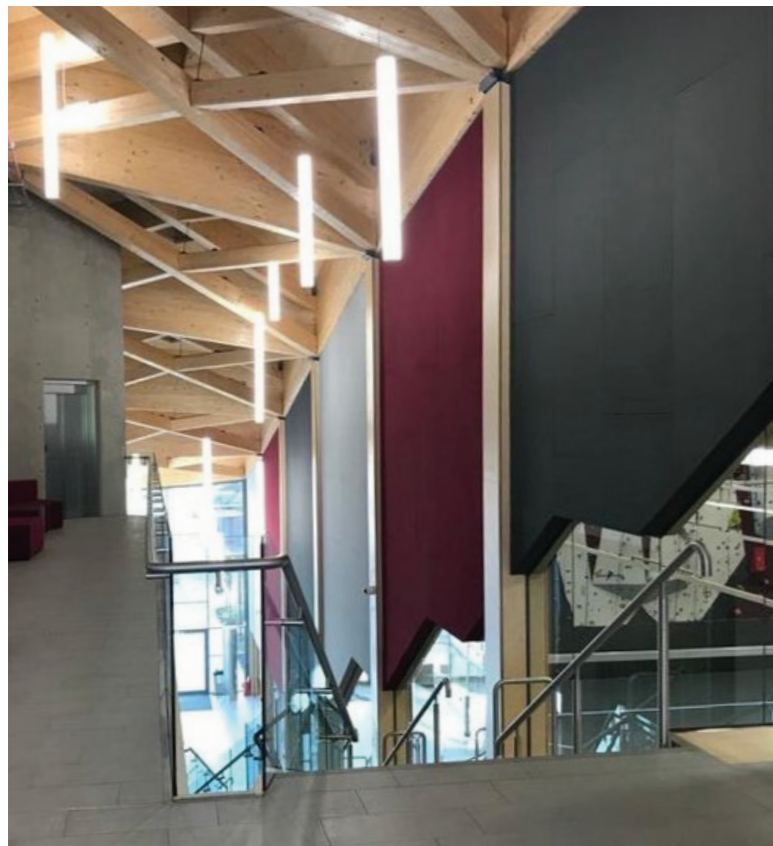

Standard Panel Sizes: 1200 x 900mm / 1200 x 1200mm / 1200 x 1800mm / 1200 x 2100mm / 1200 x 2400mm / 1200 x 2700mm / 1200 x 3000mm (40mm) / Bespoke on request
Core Material: High Density Fibreglass (3kgs m² & 4kgs m²)
Acoustic Performance: Class A – 40mm thick panel – & Class C – 25mm thick panel

Fabric Reference: Camira Cara, Lucia & Lucia CS Class 0 (Standard Range) / Camira Blazer Lite Class 0 (Premium Range)

Fabric Lightness: 6 (ISO 105-B02)
