# Harmony Slatted Ceiling & Wall Panels

Suspended slatted timber acoustic ceilings and wall panels which can complement a wide range of room types. Harmony Slatted Panels are beneficial both acoustically and aesthetically, and intended for interior ceilings, wall paneling & balustrades etc.

## Overview

Our slatted timber walls & ceiling products enable the designer to introduce warmth and character with a functional role. The prefabricated modular nature of the products construction allows a fast and accurate installation process. Fixing methods allow for fixed and demountable systems to be integrated into the product.

Slat sizes & timber type to be specified by the client and are available up to class A performance

The nature of the product allows slats to be set out around the services, if required and co-ordination to integrate, light fixture, sprinklers, access panels, etc.
