Harmony Slatted Modular Wall & Ceiling Panels

Our slatted timber walls & ceiling products enable the designer to introduce warmth and character with a functional role. The prefabricated modular nature of the products construction allows a fast and accurate installation process.

Overview

Our Harmony Modular panel system is quick and simple to install and can complement a wide range of rooms. Fixing methods allow for fixed and demountable systems to be integrated into the product. Ceiling panels are installed onto a T24/T15 black ceiling grid.

The nature of the product allows slats to be set out around the services, if required and co-ordination to integrate, light fixture, sprinklers, access panels etc.

Quick and easy access for maintenance of services within the ceiling void. Wall panels are fixed via a black headed screw through the black timber cross-ties into battening behind.

- Class A acoustic performance
- Timber slatted wall & ceiling panels
- Quick & Easy access for future maintenance
- Lay-in grid modular ceiling panels

Features

Timber Slat Specification: 44mm w x 22mm d, 20mm w x 44mm d, 20mm w x 70mm d (Other sizes / spacing available)
Modular Panel Sizes: 600mm x 600mm / 600mm x 1200mm / 600mm x 1800mm
Spacing: Minimum 40% open space to achieve Class A Absorption
Standard Range Timber: Standard: Solid Oak, Ash, Beech, Douglas Fir, Cedar, Birch, Stained Pine
Fabric Backing: Fibretex – Fiberacoustic 75 Black or Black Faced Novisol
Slat Profile Types: Square (SQ), Rectangle (RT)
Insulation: Black faced Novisol 20mm Insulation – Class A
