Serenity V-Groove

Serenity V Groove is an absorbent wall panel design to reduce reverberation and echo within interior spaces by soaking up unwanted noise.

The 12mm panels are constructed from our Eco Polyester material; compressed polyester manufactured using post-consumer recycled polyester from plastic bottles. Choose your perfect colour combination from a selection of 22 different Eco Polyester base colours and over 15 fabrics.

We offer 9 unique surface designs as standard, or you can work with our expert Design Team to create something truly unique.

Features

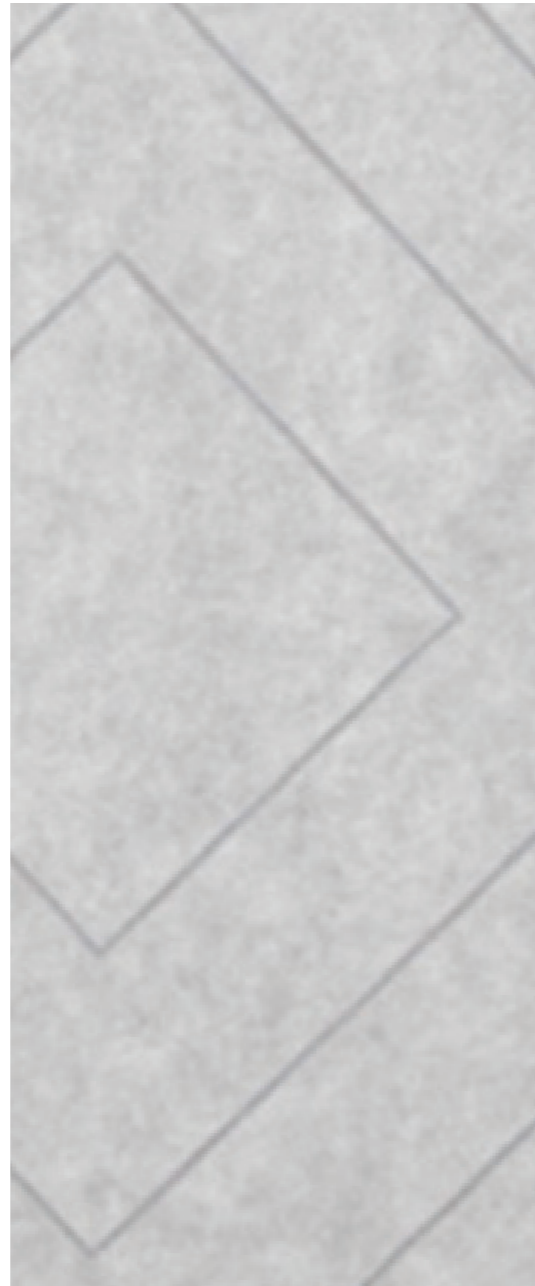

Core Material: Compressed Polyester

Acoustic Performance: Sound Absorption Class: 12mm = NRC 0.95

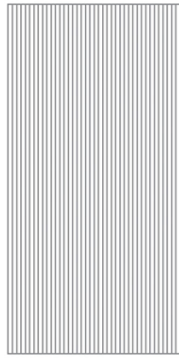

Thickness: 12mm

Weight: 4.5kg/m²

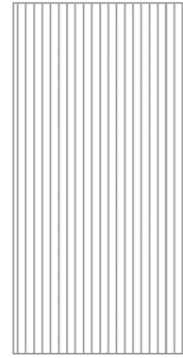

Fire Resistance: Part 1: Panel has been tested to EN 13501-1:2007+A1:2009 Fire classification of construction products and building elements—Part 1: Classification using data from reaction to fire tests, Class B.

Please note: These colors are representative of the actual colours which may vary in shade or texture. We're able to provide actual panel samples on request.
